

PENGEMBANGAN PLATFORM PEMBELAJARAN DENGAN FITUR PEMBUATAN SOAL OTOMATIS UNTUK JURUSAN TKJ DI SMKN 10 MALANG

Effectively organize information from various sources to support academic research and scholarly writing.

SOURCE 1

KEY DETAILS

Record important details about your source including the title, author(s) publication date, and relevant page numbers.

Title of text: Write here	
Author: Write here	
Date of publication: Write here	Pages: Write here

NOTES

Take notes under the following categories to capture the key ideas and insights presented in the source, focusing on the information most relevant to your research question or topic.

Main topic/thesis	Summarize the main points, arguments, or findings of this source in your own words.
-------------------	---

Paraphrased ideas	My analysis, interpretation or elaboration
Record your understanding of important key concepts, arguments, or findings from the source you're studying.	Critically engage with the content of the source and reflect on how it relates to your research question or thesis. Offer your own insights, interpretations, and evaluations of the material. Connect the information from the sources to your broader understanding of the topic and its significance in your field of study.
Paraphrase the information in your own words by changing the language and sentence structure while retaining the meaning.	
Include proper citations to acknowledge the source of the information.	
Direct quotations	My analysis, interpretation or elaboration
Capture verbatim quotes from the source that you find particularly insightful, eloquent, or essential to your research.	Critically engage with the content of the source and reflect on how it relates to your research question or thesis. Offer your own insights, interpretations, and evaluations of the material. Connect the information from the sources to your broader understanding of the topic and its significance in your field of study.
Ensure that the quoted text is relevant to your topic and supports your argument or analysis.	
Provide accurate citations for each quotation to comply with academic integrity standards.	

Key terms	- List key terms or concepts introduced in the source that are central to understanding the content - Provide clear and concise definitions for each key term, drawing from the sources or supplementary materials
Connection to assignment	- Consider how the information from the source connects to the specific requirements or objectives of your assignment. - Identify key themes, arguments, or evidence from the sources that are relevant to addressing the assignment prompt. - Analyze the implications of the information for your argument, thesis, or research question.

Additional notes

- Use this section to jot down any additional thoughts, questions, or observations that arise as you engage with the source.
- Capture ideas for further research, potential connections between sources, or areas where you need clarification.

Reference List

Cite your source using the course or university's preferred referencing style

SOURCE 2
